Personalized Solutions

From one R&D bottleneck to a working PoC in four weeks,
delivered by senior practitioners.

DURATION

4 weeks

SCOPE

fixed

DELIVERED BY

founders + SMEs

WEEK 1

Understand

1 day on-site · 8-10
stakeholders

Deliverable → Goal-
aligned engagement brief

WEEK 2

Analyze

Internal + market/competitor
scan

Deliverable → Weighted
list of bottlenecks, scored

WEEK 3

Plan

Hybrid co-creation w/ your
SMEs

Deliverable → Costed
project briefs, ROI model,
prioritized roadmap

WEEK 4

PoC

Hands-on, expanded
stakeholder group

Deliverable → Working
automation / AI tool in your
environment

WHAT THE WORK YIELDS

10×

faster cell registration

3×

pre-clinical pipeline growth

~35%

cost reduction

Figures from client engagements such as the Digital Biorepository at a global Swiss pharma and comparable digital-transformation programs.

"There is a technology for nearly every question in R&D today. The real
bottleneck is defining the question with enough clarity to make technology pay
off. That is where we start."

METHOD: R&D IN A BOX

Software tools: user-friendly platforms for experiment
design.

Data integration: consolidating experiments into
actionable insight.

Automation: robotic systems, precision liquid handlers.

Customisation: flexible architecture per assay type.
